HOOK SECURITY

Safelisting and Bypassing Filters

Welcome! We're glad to have you on board.

While some see success in safelisting the primary IP address listed in the User Guides, safelisting all of our server addresses can be helpful to improve deliverability of system emails, phishing simulations, landing & training pages.

Safelist our server addresses below:

64.191.166.196

64.191.166.197

198.61.254.6

54.80.160.189

64.191.166.198

54.88.246.212

54.240.70.101

54.240.70.102

In order to access safelisting instructions for your email provider or spam filters, please explore our knowledge base here.
